NINTENDO 64 COMPATIBLE ACCESSORIES

This game is compatible with the Rumble Pak and Controller Pak accessories. Please read the Rumble Pak and Controller Pak accessory Instruction Booklets carefully. Follow On-Screen instructions to determine when you should insert or remove the Rumble Pak or Controller Pak accessories.

Anytime you start a game, you will be prompted to insert your Rumble Pak at that time. If you are not using a Rumble Pak, just press the **Start Button** when the Rumble Pak insert prompt is displayed. You can also disable the Rumble Pak in the Options Menu (see pg. 10).

* REMEMBER *

It is important to only switch your Rumble Pak and Controller Pak when prompted to do so.

KONTROL STICK FUNCTION

The Nintendo 64 **Control Stick** uses an analog system to read the angles and directions of its movement. This allows precision control that is not possible using the conventional **Control Pad**.

When turning the Control Deck power **ON**, do not move the **Control Stick** from its neutral position on the controller.

If the **Control Stick** is held at an angled position (as shown in the picture on the left) when the power is turned **ON**, this position will be set as neutral. This will cause games using the **Control Stick** to operate incorrectly.

To reset the neutral position once the game has started, let go of the **Control Stick** so it can return to its center position (as shown in the picture on the left) then press **START** while holding down the **L** and **R Buttons**.

The **Control Stick** is a precision instrument, make sure not to spill liquids or place any foreign objects into it. If you need assistance, contact Nintendo Consumer Assistance at 1-800-255-3700 or your nearest Nintendo Authorized Repair CenterSM.

MAIN MENU

At the Title Screen, press the **Control Pad Up** or **Down** to highlight, then press the **A Button** to select from one of the many game modes. They are:

ARCADE

1 ON 1 KOMBAT

It's you against the CPU. You select one character, then go to the Destiny Screen to choose the difficulty of your journey. Also, you can take on a buddy in a 2 player game. Each player selects one character, then go straight to a Lair to battle it out.

2 ON 2 KOMBAT

Select 2 characters, then take on 2 characters chosen by the CPU. You'll then go to the Destiny Screen to select the difficulty of your opponents. When you or the CPU loses the first match, the second chosen character will appear to continue the battle. A loser is determined when both chosen players have been eliminated.

Also, you and a friend can choose two characters, then battle it out. When a player loses his first match, the second chosen character will appear to continue the battle. A loser is determined when both chosen players have been eliminated.

TEAM

You take on the CPU with a team of MK4 characters. When you select this game mode, you'll go to the Choose Team Size Screen. Press the **Control Pad Up** or **Down** to highlight options. To select the size of a team, press the **Control Pad Left** or **Right**. When your team sizes are set the way you want, select Choose Team Members to set up your team.

MAIN MENU

You'll view the Character/Team Select Screen. Follow on-screen instructions to set up your team. Select Begin Fight when you're ready.

You can also take on your friend with a team of MK4 characters. (See **Team**, on the previous page, for team selection instructions.) The player who loses all his characters first will be defeated.

ENDURANCE

You'll view a sub menu when you select this option. When you select **Endurance** from the sub menu, you'll select a character, then go to the Destiny Screen to select a difficulty. You'll fight one round at a time against each character on the column you choose on the Destiny Screen. Your Health never regenerates in any Endurance mode, and you must win every match to win. Lose one match, and the game is over.

VS ENDURANCE

The CPU chooses the characters for you and a friend in a pre-determined order. Both players use each standard character in the game to continue battling each other. When one player uses all of the game's standard characters, the endurance match is over. The player with the most wins claims victory.

ULTIMATE ENDURANCE

You'll fight one round at a time against each character in the game. You must win every match to win this game mode. Lose one match, and the game is over. When you're finished (win or lose), your Ultimate Kombat Rating will be displayed with statistics and a Kombat rating level.

* IMPORTANT WARNING *

Do not remove the Controller Pak or the Rumble Pak from the Controller unless instructed to do so. Doing so may cause the game to operate improperly and/or cause damage to the Pak.

CONTROLLER PAK MENU

After selecting any game mode, you'll view the Fighter Select Screen Screen to choose the player you want to fight with. It displays all the available characters and 3 selection options.

Press your **Control Pad Up**, **Down Left** or **Right** to highlight a player or option, then press the **A Button** to select. Included are 3 other on-screen options you can use to select your player(s):

RANDOM

When you select this option, the computer will randomly choose a character for you.

GROUP (2 Player Only)

When you select this option, the computer will display and select players in a particular order. You must defeat your opponent with each character chosen by the computer.

HIDDEN

This is handy for a 2 player game. If you don't want your opponent to see the player you select, select this option first. It will hide your cursor, but make sure you keep track of how many times you select **Up**, **Down Left** or **Right**. If you get confused, even YOU won't know who you selected.

Note: If both players select the same warrior, player two will be displayed with a different color.

CHOOSE YOUR DESTINY

Once you've chosen your fighter in any 1-Player **Mortal Kombat 4** mode, you'll view the Destiny Screen.

Press the **Control Pad Left** or **Right** to highlight, then press the **A Button** to select one of these columns: Novice, Beginner, Warrior, Master or Champion. You'll see a large tower scrolling with **Mortal Kombat 4** characters' faces.

To claim ultimate victory, you must defeat each of the characters on the column. Each time you defeat an opponent, you'll return to the Choose Your Destiny Screen and view your next opponent.

If a second player wishes to join the fight, he may do so at any time by pressing the **Start Button**. Both players then return to the Character Select screen to select a fighter. The Choose Your Destiny Screen will not be displayed in any 2 Player game.

FIGHTING SUMMARY

Mortal Kombat 4 tests a Warrior's fighting skills by pitting him against increasingly formidable challengers. In all Mortal Kombat battles, **Health** meters in the upper portion of the screen measure each warrior's diminishing health.

The meters begin each round reflecting health at 100%, but the amount of health is reduced with each blow taken. The reduction amount depends on the type of contact and whether or not it was blocked. When a Warrior's **Health** meter is depleted, he/she is knocked out and the round goes to the opponent.

Each match has a 99 second **Match Time** limit. If the time is up before either combatant has been defeated, the warrior with fewer injuries is declared the victor. The first warrior to win two rounds takes the match and moves on to the next opponent.

The **Run Meter** allows you to run toward your opponent and perform combos, but they are "time sensitive", so you can only activate the Run function (or Combo function) while the meter is green.

If you're defeated by an opponent, you'll find yourself plummeting helplessly into the darkness of a very deep pit. If you have a Continue available, press the **Start Button** to return to the Select a Fighter Screen and select another fighter for battle.

BASIC MOVES

Each *Mortal Kombat* Warrior has spent years of concentration and intense training to perfect his/her martial arts skills. Before challenging these Warriors in combat, you'll also need intense training and concentration to learn these fundamental skills.

The best way to begin your training is with the fundamental moves: **Kicks, Punches, Crouches, Jumps and Blocks.**

These moves may seem trivial compared to powerful and acrobatic moves, such as a **Flying Kick**. However, knowing how to stop, avoid or counteract a flying kick can be far more useful than knowing how to land one yourself.

The **Run Button** is especially powerful. Backing off won't cut it against this move. Hold the **Run Button** while pressing the **Control Pad** toward your opponent to execute a run. But make sure you have a move ready when you meet face to face.

KLOSE QUARTERS

Moves used during close-in combat situations are the **Elbow**, the **Knee**, the **Bonebreaker** and the **Throw**. They are highly effective and do not require full limb extension, which is impossible in close quarters. Although these moves are potent, they can only be used when you are directly adjacent to an opponent. Give it a try. Press the Attack Buttons in a certain sequence for different types of "Kombos".

BASIC KOMBAT MOVES

All of the **Mortal Kombat 4** warriors possess expert fighting skills. What raises them above their peers are the special moves which they've created and perfected. In order to become a superior warrior, skilled enough to win the title of Grand Champion, you too must learn and perfect these moves. Whether you use special kicks or elemental bolts, **Mortal Kombat 4** warriors are the fiercest and most ferocious kombatants in the Universe. Mastering their special moves could propel you to that level of greatness (see next page).

KROUCHING MOVES

Defensively, the crouching moves let you escape from close proximity, avoid punches, aerial weapons and throws. Offensively, the uppercut executed from the crouch, is one of the most powerful offensive weapons.

To do the crouching moves, hold the **Control Pad Down (Crouch)** and simultaneously push the **High Kick** or the **Low Kick Button** for a crouching kick. Hold the **Control Pad Down (Crouch)** and push the **High Punch** for an uppercut. The **Block** can always be used to defend against your opponent's moves.

SPINNING MOVES

The spin is the key to exotic moves, such as the **Roundhouse Kick** and the **Foot Sweep**. The **Foot Sweep** hits your opponent's ankles and knocks him on his butt.

The **Roundhouse** is a spinning kick that nails your opponent in the face. To execute the spin moves, hold the **Control Pad** away from your opponent while you press the **Kick buttons**.

All together, these fundamentals are the foundation for both a strong defense and a potent offense.

AERIAL MOVES

The final moves one should learn are these Aerial moves: **Flying Punches** and **Kicks**.

To execute these moves, either jump in place (**Control Pad UP**) or jump toward (**Control Pad UP + Fwd**) your opponent. Press the game's various Attack Buttons while you're in the air. Unlike most attacks, aerial attacks must be timed properly to land blows.

SECRET KODES

At the bottom of the VS Battle Screen you will see a row of six boxes with different icons in them. Player 1 can change the icons in the first three boxes by pressing the **Low Punch** (1st box) **Block** (2nd box), and **Low Kick Buttons** (3rd box).

Player 2 can do the same with the other three symbols. The six symbols represent secret codes which can have subtle or dramatic effects on game play.

Pressing a button 7 times will cause the order of the icons to start over again. In other words, pressing a button that corresponds to a box with a skull symbol 7 times will change back to the skull icon.

Each button causes the symbol in the corresponding box to change to the next icon in a pre-determined order. If you hold up while pressing **Low Punch**, **Block** or **Low Kick**, the order in which the icons are cycled will be reversed.

Some players find it easier to memorize the codes by referring to them in terms of the number of button presses it takes to get the proper symbols in place. In any case, you'll get the hang of it after a few tries. Remember, you have to be fast and precise. No one said this was supposed to be easy.

Note: You can find secret codes in store bought Strategy Guides, game magazines, the Internet, or with a little experimentation on your part. Have Fun.
